SUMMARY

Detail-oriented Computer Science student at UC Irvine seeking a Software Engineering/Web Development role to apply full-stack skills, agile methodologies, and cloud technologies toward impactful, user-focused solutions.

EXPERIENCE

Lead Application Developer

Consense

February 2021 - March 2022, Irvine, CA

- Designed and developed a fully functioning and responsive full-stack mobile application that handled GPS navigation and Bluetooth communication with a proprietary piece of hardware.
- Helped other developers with version control with Git and unit testing with Jest.
- Leveraged Firebase as a NoSQL database for storing near misses between cyclists and vehicles.

Project Leader

Summer Express

March 2019 - March 2021, Houston, TX

- Administrated a summer camp for refugee children.
- Walked the children through basic programming using the language Scratch.
- Individually tutored children in Math, Science, and Language Arts.
- Planned fun activities outside of tutoring, like a trip to the Houston Zoo.

Intern

Strohmeier Law

June 2020 - August 2020, Houston, TX

- Modified HTML/CSS on the company website to improve Search Engine Optimization, Responsiveness, and A11y accessibility.
- Collaborated with other interns to keep probate data up to date.

PROJECT

Pathfinding Algorithm Visualization Tool

pathfinding-visualization.netlify.app/

- Developed a single-page application in React that allows users to randomly generate mazes or design their own, and watch as the maze is solved using either depth or breadth-first search.

Sorting Algorithm Visualization Tool

sortingalgorithmvisualization.netlify.app/

- Developed a single-page React application that allows users to watch various sorting algorithms sort an array of their own choosing.

EDUCATION

Computer Science and Engineering

University of California, Irvine · Irvine, CA

- September 2021 - Present

CERTIFICATIONS

Responsive Web Design

FreeCodeCamp

- Completed coursework demonstrating foundational knowledge of responsive and accessible web design.

Javascript Algorithms and Data Structures

FreeCodeCamp

- Completed coursework demonstrating foundational knowledge of algorithms and data structures in Javascript.

Backend Development and APIs

FreeCodeCamp

- Completed coursework demonstrating foundational knowledge of backend development and RESTful APIs.

SKILLS

UI/UX Design, Javascript (ES6+), Typescript, React, React Native, Next.js, Node.js, HTML/CSS, PostgreSQL, Firebase, AWS(S3), Jest, Python, Java, C++, Git
